

MN-CMS Newsletter

The MN-CMS National Programme Team remains committed to its contribution to the improvement of quality and safety of patient care

MN-CMS Code Upgrade and RHO Flip

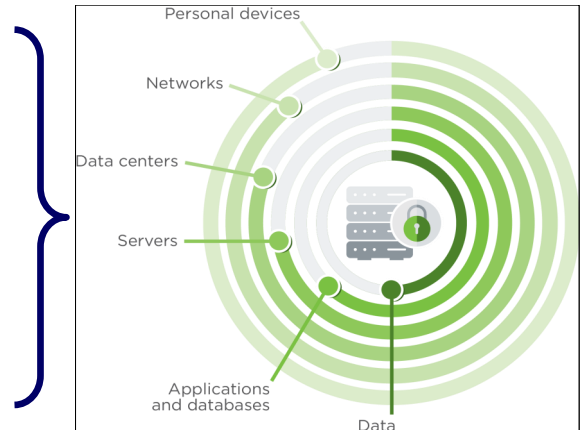

This year MN-CMS will upgrade its code-base to the latest version (2018) thereby providing the most up to date version of software available. It is mostly a stability and technological upgrade to set the foundation for functionality improvements. With the code upgrade we can leverage Continuous Delivery to improve user experience.

MN-CMS is moving to a Technology Managed Service (TMS) hosted in Sweden i.e. Remote Hosted Option (RHO)

RHO Special points of interest:

- The RHO Flip brings with it the benefits of 99.9% availability
- Up-to-date hardware, operating systems and layered technology
- It is GDPR Compliant
- Cerner security tooling to ensure strengthened cyber security leveraging their layered security model
- Disaster Recovery (DR) system is fully synched with the live system
- iBUS and 724 Upgrades

Cerner Layered Security Model

FetaLink upgrade will follow successful Code Upgrade and RHO Implementation.

Recent additions to the MN-CMS team

Rhona Drummond	Theatre and Anaesthetic Lead
Geraldine Mc Aleer	Testing Lead
