

Sheila Dunleavy

eHealth Senior Project Manager, Technology office, eHealth

Senior Project Manager and Global Trotter

What I do in my job?

I am the Senior Project Manager for the HealthIRL Programme. Our Team is completing the migration of all HSE Staff from their regional legacy domains to one National domain. We are a relatively small team with a mighty mandate which will be completed later this year. My Role involves interaction with multiple technical teams within eHealth and also local IT teams, Business, Community and Acute Managers, Vendors and pretty much every role within the HSE to organise the migration of every single member of the HSE to the HealthIRL Domain.

Motivation:

There is a huge sense of achievement to seeing a problem or issue resolved and see the number of HSE Staff on the HealthIRL domain increase on a weekly basis. This programme is a foundation for innovations, collaboration and introduction of applications which will support staff in clinical areas in the future, along with strengthening security for the organisation.

Advice to women thinking of a career in health service:

Just Do IT! For women in the technology sector, the HSE is a very positive place to work in my experience. I meet and work with wonderful people along the way, who are happy to share their knowledge and create improvements. I am very glad I made the move!
