

Orla Fox

Senior Project Manager, MN-CMS, Acute Delivery

What I do in my job?

I am a Senior Project Manager for eHealth's Change and Portfolio Management Office currently assigned to the Acute Delivery's Maternal and Newborn Clinical Management System EHR. (MN-CMS) The programme has implemented a fully electronic health record for women and babies in 4 of 19 maternity hospitals across Ireland and we are currently deploying to a further two sites as part of Phase II of the programme

Motivation:

My role is a wonderful opportunity to be part of an amazing team responsible for the exciting roll out of an electronic health care record which provides improved patient care as a result of high quality readily available data to support the decision-making process. The electronic health record, underpinned by technology, has transformed healthcare with the patient at the centre of the complete solution.

Advice to women thinking of a career in health service:

As women in the health service, we stand side by side with our male counterparts working collaboratively to ensure the eHealth Ireland vision is realised. During these exciting times of restructuring into RHAs, the new digital health strategy and the financial investment in eHealth I would encourage all ladies to visit the eHealth Ireland website to learn more. Take that leap of faith in to the HSE eHealth sector and allow yourself experience first-hand the wonderful opportunities the service has to offer. These opportunities will allow you grow both professionally and personally offering patient focused job satisfaction and a career path you won't regret.

Senior Project Manager who, when not in the office, loves spending time catching up with family and friends
