

Irish National Early Warning System Score reference set

Term	Preferred Term	Concept Id
Acute respiratory distress (finding)	Acute respiratory distress	373895009
Bleeding (finding)	Haemorrhage	131148009
Blood pressure (observable entity)	Blood pressure	75367002
Capillary blood glucose measurement (procedure)	Capillary blood glucose measurement	302789003
C-reactive protein measurement (procedure)	C-reactive protein measurement	55235003
Hypothermia (finding)	Hypothermia	386689009
Myocardial infarction (disorder)	Heart attack	22298006
Poisoning caused by drug AND/OR medicinal substance (disorder)	Poisoning by drug AND/OR medicinal substance	7895008
Sepsis (disorder)	Systemic infection	91302008
Tachycardia (finding)	Tachycardia	3424008
Traumatic brain injury (disorder)	Traumatic brain injury	127295002
12 lead electrocardiogram (procedure)	12 lead ECG	268400002
Acidosis (disorder)	Acidosis	51387008
Airway management (procedure)	Airway management	386509000
American Heart Association advanced cardiac life support protocol (procedure)	American Heart Association advanced cardiac life support protocol	741679001
Blood pressure rise (qualifier value)	BP rise	255330009
Cardiac telemetry (regime/therapy)	Cardiac telemetry	422952004
Complete atrioventricular block (disorder)	Complete atrioventricular block	27885002
Delirium (disorder)	Delirium	2776000
Electrocardiographic myocardial ischemia (finding)	ECG myocardial ischaemia	164861001
Electrolyte imbalance (disorder)	Electrolyte imbalance	105593004
Fever (finding)	Fever	386661006
Heart failure (disorder)	Heart failure	84114007
Hypercapnia (disorder)	Hypercapnia	29596007
Hypoglycemia (disorder)	Hypoglycaemia	302866003
Loss of consciousness (finding)	Loss of consciousness	419045004
Low blood pressure (disorder)	Hypotension	45007003
Monitoring of blood pressure, temperature, pulse rate and respiratory rate (regime/therapy)	Monitoring of blood pressure, temperature, pulse rate and respiratory rate	304495004
Pain (finding)	Pain	22253000
Patient concerned (contextual qualifier) (qualifier value)	Patient concerned	103307008
Respiratory distress (finding)	Respiratory distress	271825005
Alert confusion voice pain unresponsive scale (assessment scale)	ACVPU - alert confusion voice pain unresponsive scale	501000220108

Family member concerned about subject (observable entity)	Family member concerned about subject	541000220105
Irish National Early Warning System (procedure)	INEWS(Irish National Early Warning System)	651000220108
Irish National Early Warning System Bedside Response (procedure)	INEWS (National Early Warning System) Bedside Response	631000220102
Irish National Early Warning System Escalation and Response Protocol (record artifact)	INEWS (Irish National Early Warning System) Escalation and Response Protocol	571000220103
Irish National Early Warning System Score (assessment scale)	Irish National Early Warning System Score	741000220101
Irish National Early Warning System Urgent Response (procedure)	INEWS (Irish National Early Warning System) Urgent Response	731000220105
Monitoring of INEWS physiological observations-respiratory rate oxygen saturation the fraction of inspired oxygen heart rate blood pressure alert confusion voice pain unresponsive scale temperature (regime/therapy)	Monitoring of INEWS physiological observations-respiratory rate, SpO2, FiO2, HR, BP, ACVPU, temperature	641000220106
On examination - decreased level of consciousness (finding)	O/E - decreased level of consciousness	417473004
On examination - pupil reaction (finding)	O/E - pupil reaction	268976003
Staff member concerned about subject (observable entity)	Staff member concerned about subject	611000220107
