# System Characteristics

	Consumer/Service User Meaning	Clinician Meaning	CIO Meaning
Safe	My family and I will not be harmed by the IT system.	Our patients will not be harmed by either temporary loss of our IT system or IT system errors.	Our IT system is robust and will identify if things are going wrong. It will support our clinicians and patients
Effective	My family and I receive the right information to allow us to make choices about treatment for our conditions, and the IT system contributes to improving wellbeing.	The IT system ensures that care provided is based on best evidence and produces the desired outcome.	Clinical governance of our IT systems supports quality improvement, innovation and research which results in improved health outcomes
Person-centred	I am the owner of all data about me. The IT system documents my goals and preferences that are used in my wellbeing/care plan. The IT system ensures that my family and I are treated with respect and dignity. The IT system places me at the centre of all my care decisions.	IT system development actively seeks and utilises clinical voice. The IT system supports joint decision making.	We have an organised clinical voice across our IT system development rohe that ensures we have an equal partnership with clinicians.
Productive	The IT system ensures that care received from all practitioners is well co-ordinated and efforts are not duplicated.	The IT system supports us to deliver care to our patients using available human, physical and financial resources efficiently, with no waste to the system.	Our IT system ensures health and social care alignment. IT resources are deployed to ensure best value for our community.
Timely	The IT system supports clinicians to ensure that patients know how long they must wait to see them for tests or treatments they need and why. Patients are confident this wait time is safe and appropriate.	The time taken for clinicians to access information from IT systems is as short as possible. The IT system supports clinicians to provide care within an appropriate and acceptable time after the need is identified.	Our IT systems are designed to ensure clinicians can quickly and easily access information and that patients receive health care in a timely way.
Equitable	No matter who I am or where I am, I can access information about me held on IT systems.	Our patients have access to the information they need regardless of their location, age, gender or socio-economic status.	Our IT system design supports delivery of equity of outcome. People own their data

# Referral Process

Team A Referral Process Jan-Nov 2024

**Thank You**
