What is Digital Clinical Safety? (and when?)

Management of all aspects of risk relating to Digital Health including patient safety and service provision.

About Patient Safety.

From planning to decommissioning.

How?

Scope of Project

Digital Clinical Safety Plan

- Who will work on Digital Clinical Safety?
- Who gives authority to the process?
- When is the process started & completed?

Hazard Log

- Identification
- Analysis
- Mitigation

Clinical Safety Case

- Hazard Log
- Clinical Safety Report

The Digital Clinical Safety Process

Why?

There is evidence from other jurisdictions that Digital Health Systems can indirectly cause serious harm

Anticipate and address before an incident! Cheaper and faster than fixing problems later.

There is no going back – we will see an acceleration of Digital Health

Stepping Stones

Digital Health Passport: Digital Health Clinical Safety Module; → Web presence; → Digital Health Clinical Safety Strategy; → Model for major projects under development; → Building a Community of Practice:
- Access to NHS Essentials on-line course;
- Select a project and develop a Hazard Log – share and discuss;
- Small groups (5/6) on Teams.

It's about focussing the mind-set on Patient Safety for Digital Systems.
